

Machine Coding Round Eight

Meetup App

The goal of this assignment is to create a Meetup App using React JS.

Instructions:

1. Create this application using React JS Hooks.
2. You can use plain CSS or any CSS library you want.
3. Data has been provided.
4. This is a frontend assignment. No backend involved.
5. You have to host your site live and submit the live link along with Github link of your code or you can choose to code on CodeSandBox and submit the CodeSandBox link.
6. You have to complete the below mentioned features and make your submission here on LMS in 2 hrs.
7. You can use google for your coding errors and queries.

App Features:

Event Listings:

- Create an event listing page that displays key details prominently, such as event title, date and type of event (Online/Offline).
- Include a thumbnail or image related to the event to provide visual context.
- Use a consistent layout and design to ensure a cohesive and user-friendly experience.

Event Search and Filtering:

- Dropdown: Type of Event: Online/Offline/Both. Both should be the default view.
- Search box: Search by event title and tags.
