

Machine Coding Round Seven

Trip Advisor

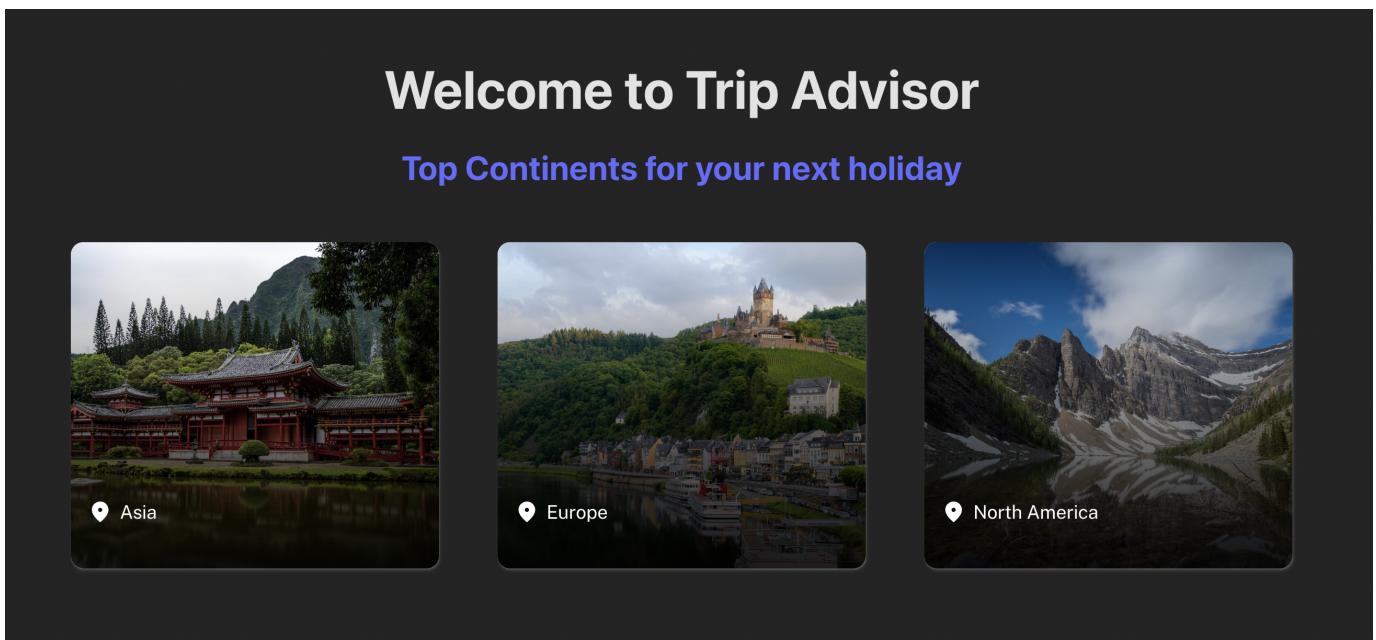

The goal of this assignment is to create an app like Trip Advisor using React JS.

Instructions:

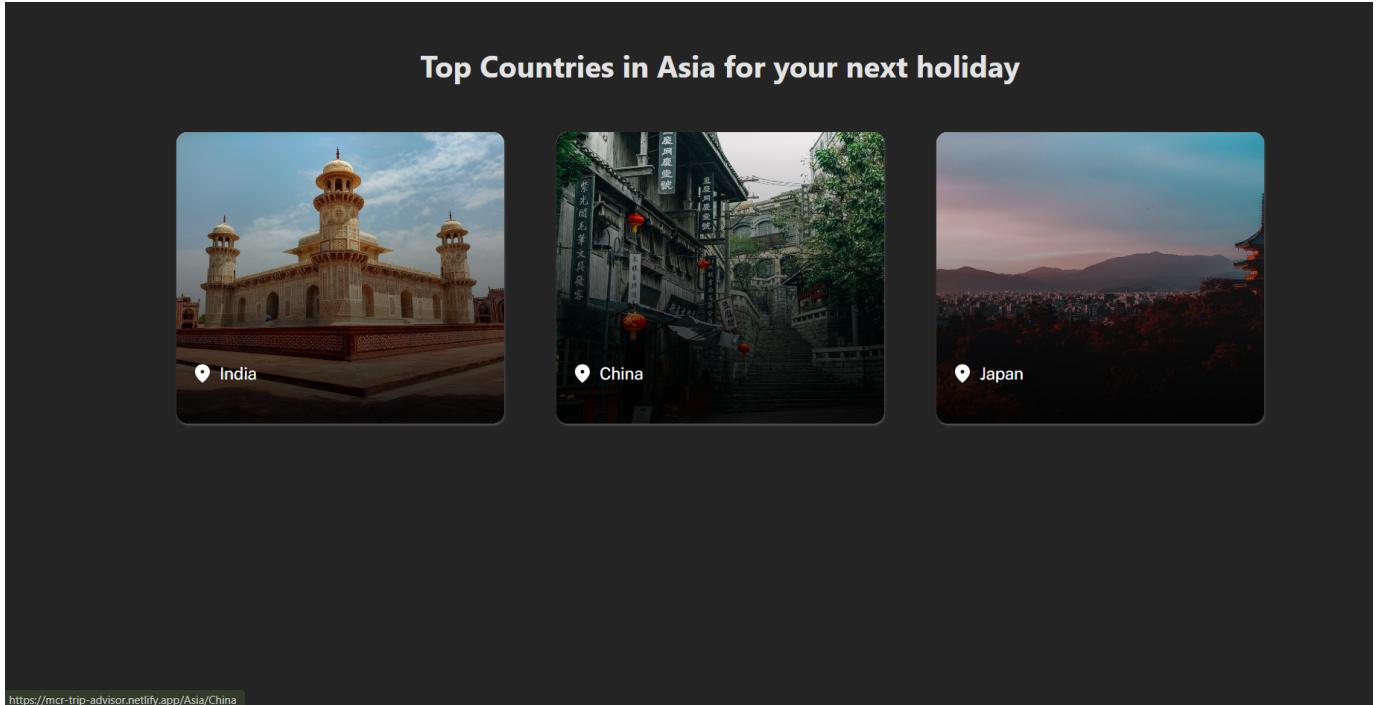

1. Create this application using React JS Hooks.
2. You can use plain CSS or any CSS library you want.
3. Data has been provided.
4. This is a frontend assignment. No backend involved.
5. You have to host your site live and submit the live link along with Github link of your code or you can choose to code on CodeSandBox and submit the CodeSandBox link.
6. You have to complete the below mentioned features and make your submission here on LMS in 1 hrs.
7. You can use google for your coding errors and queries.

App Features:

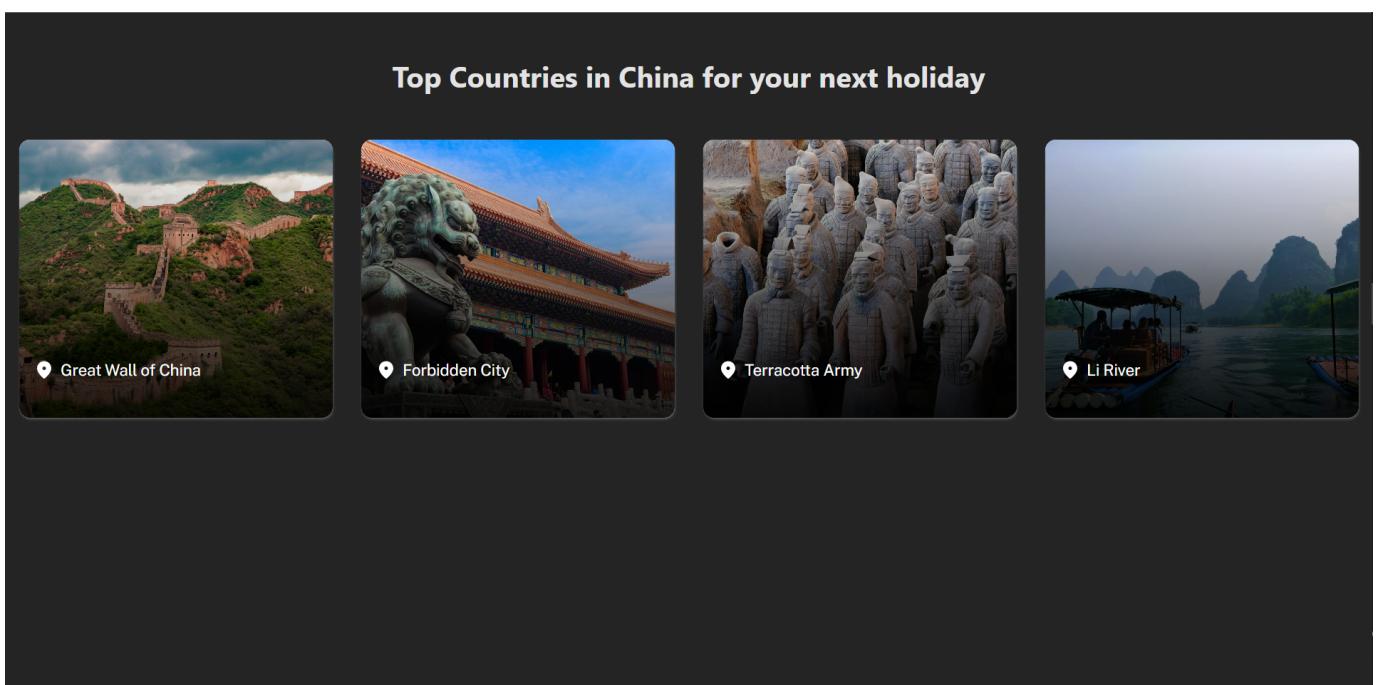

1. Create Continents Category Page: Create a category page where users can select a continent.
This page will display a list of available continents.

2. Create Country Category Page: Create a category page where users can select a country. This page will display a list of available countries.

3. Create List Page: Create a list page where users can view a list of destinations based on the selected country. This page will display cards or a grid layout showing summary information about each destination.

4. Create Detail Page: Create a detail page where users can view detailed information about a specific destination. This page will display images, descriptions, ratings, reviews, and other relevant details. The website link should open in a new tab.
